

**IT'S THE FIRST STEP...**

**LABEL IT!**

Putting labels on union-made products is the vital first step in a system that protects you. Locals must ensure that fabrication shops have labels. Fabricators must apply the labels - **every piece, every time!** And installers must check all products arriving on construction sites to see if they are labeled.

Without labels affixed to products, installers can't scan bar codes and business reps can't check to see if wage equalization should take place.

**Apply the label to protect your jobs, wages, and benefits.**
